

Immunoglobulin A nephropathy (IgAN) in focus:

redefining diagnosis,
reimagining management

Saturday 20 September 2025 | 08:05–08:50 CEST
Hall A1, Cubex Center Prague, Prague, Czech Republic

Please join us for an informative and interactive session, in which renowned global medical experts will discuss practical strategies on how to diagnose IgAN earlier to optimize long-term patient outcomes, and how a combination of clinical and histopathological findings and emerging tools, such as biomarkers and AI, may support diagnosis and define patient profiles. Our faculty will also discuss ways nephrologists and pathologists can better collaborate to support earlier diagnosis and personalize care pathways. The session will feature engaging panel discussions, and provide the opportunity for active audience engagement.

Agenda

Duration	Topic	Speaker(s)
5 min	Welcome and introduction	Hernán Trimarchi (Chair)
40 min	Adjusting the lens: collaborative innovation in IgAN care	Hernán Trimarchi, Heather Reich and Ian Roberts
—	Summary and close	Hernán Trimarchi (Chair)
